Dedicated to those Banjo enthusiasts who for many years maintained allegiance to their favorite instrument, despite a seeming hopeless future for it, until their insistent demand upon the makers brought to its fulfillment the day of triumph and the dawn of a new musical era.

The Regal Wood Rim Art Banjo

Represents the greatest revolution and highest achievement known to musical instrument making in the history of this country.

A real sustained tone could never be acquired on the old style metal rim banjo, hence the instrument was always discarded as unsatisfying to a true musician, and in this instrument alone is demonstrated the fact that the banjo is worthy of a thorough course of study, as a satisfying return may be obtained by the most ambitious student.

Many eminent soloists state that the new Regal Banjo will at once bring about the revival of Banjo music far surpassing its old time furore, as the new instrument will attract and hold its admirers from a true musical standpoint, and not simply as a popular fad.

Our booklet, "The Evolution of the Banjo," treats of the subject at length, and will be cheerfully mailed free to anyone interested.
